{{ 花山之响 }}

作品简介
Introduction to the work

《花山之响》是一件以广西左江花山岩画与壮族铜鼓文化为灵感的交互装置作品。

花山岩画创作于战国至东汉时期，其赭红色蹲式人形与铜鼓纹样，被认为记录了骆越先民祭祀蛙神（蚂拐）、祈求风调雨顺的仪式舞蹈，体现了稻作文明中人与自然的精神联结。

本装置以铜鼓作为核心意象，构建一个可被参与的当代仪式空间。观众站在鼓面前，挥舞鼓槌引导光点，与鼓面周围六只蛙灯互动，逐步点亮岩画小人图像。当完成六组特定动作后，装置触发“蛙神降临”，并通过吐卡装置吐出象征祝福的福卡。

作品通过身体动作、影像识别与实体反馈的结合，让远古文明在当代语境中重新被体验与唤醒。

Echoes of Huashan is an interactive installation inspired by the Huashan Rock Art of the Zuojiang River Valley in Guangxi and the ritual culture of the Zhuang bronze drum.

Created between the Warring States period and the Eastern Han dynasty, the Huashan rock paintings feature distinctive red squatting human figures and drum motifs. These images are widely understood as visual records of ancient Luo-Yue rituals dedicated to the frog deity Magong (the frog god), performed to pray for rain, agricultural abundance, and harmony with nature.

Drawing from the bronze drum as a sacred instrument that mediates between humans and the spiritual world, the installation transforms the drum into a contemporary interactive interface. Participants stand before a circular drum surface and wave illuminated drumsticks, guiding light points toward six frog-shaped lamps arranged around the drum. Each successful gesture activates corresponding animated figures derived from the rock paintings. After completing six distinct ritual movements, the installation culminates in the "arrival of the Frog Deity," triggering a 3D-printed dispensing device that releases a symbolic blessing card.

Through embodied interaction, light, and ritualized repetition, Echoes of Huashan reactivates an ancient ceremonial logic, inviting viewers to physically participate in a reimagined dialogue between ancestral belief systems and contemporary technology.
